Important Note

WARNING NOTICES

SAFEGUARDS

Electrical energy can perform many useful funtions, This unit has been engineered and manufactured to assure your personal safety. Imporoper use can result in potential electrical shock or fire hazards. In order not to defeat the safeguards, observe the following precautions for its installation, use and servicing.

Explanation of Graphical Symbols

CAUTION
RISK OF ELECTRIC SHOCK
DO NOT OPEN

CAUTION RISK OF ELECTRIC SHOCK: OPEN ONLY IF QUALIFIED AS SERVICE PERSONNEL

WARNING: TO PREVENT FIRE OR ELECTRIC SHOCK, DO NOT EXPOSE THIS EQUIPMENT TO RAIN OR MOISTURE

IMPORTANT NOTE

ATTENTION: This unit must be protected from damp because of the risk of fire and the possibility of electric shocks.

- 1. Make sure that you have the correct mains voltage. Only operate the unit at the mains voltage marked on the rear panel.
- 2. Make sure that nothing especially no metal objects are inserted into the device. This could result in electric shock or malfunction.
- 3. If the unit is subjected to extreme fluctuations of temperature e.g. On being transported from outside into a heated room, condensation can form. This unit should not be used untill it has reached room temperature.
- 4. In the event of water or any other fluid being accidentally spilt on the unit switch the unit off immediately and send it to a qualified service workshop for inspection.
- 5. Make sure that the unit is always well ventilated and never exposed to direct sunlight
- 6. Do not use sprays to clean the unit as they have a detrimental effect on the unit and could ignite suddenly.
- 7. The machine use single power switch, please cut off the power before fix.
- 8. Please do not put the cup, vessel of flower or container above the machine, in case the leak out water then cause the leakage current off the machine.

Control elements

Front Panel

The front panel LED area includes the following indicators per channel:

1. POWER SWITCH

Turn the unit power on or off

2. POWER LED

Indicate power on or off

3. LEVEL CONTROL

Calibrated detente potentiometers to alter the total gain of the power amplifier. In order to avoid distortions in mixing consoles upstream, The calibrated markings show the additional attenuation directly.

4. TEMP

Indicate amplifier inside temperature level

5. BTL LED

Indicate BTL Mode on or off

6. MUTE LED

MUTE-Audio protection under mute position.

7. CLIP/LIMIT INDICATOR

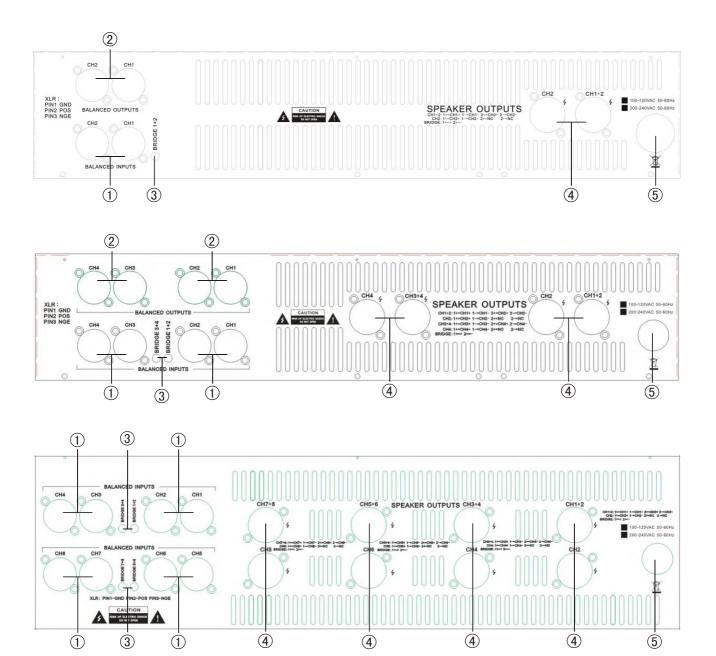

This indicator signals if the amplifier output is clipping or limiting. When the LED lights up, the limit power function is working. If the LED flashes briefly, this is not a cause for concern. If this LED is lit permanently, the volume should be reduced to avoid overload damages to the connected loudspeaker systems.

8. SIGNAL LED

Green SIG Indicates output signal levels in normal operating range

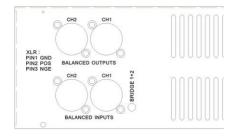

Rear panel features introduction

- 1. AUDIO INPUT
- 2. AUDIO LINK OUTPUT
- 3. BTL SWITCH
- 4.AMPLIFIER OUTPUT
- 5. POWER SUPPLY INPUT

Audio input connections

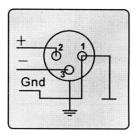

BALANCED INPUT CONNECTIONS

Audio input-2-channel models

The XLR input connectors are electronically balanced, and wired according to the IEC 268 standard (pin 2= hot). XLR input connectors should be wiredas follows:

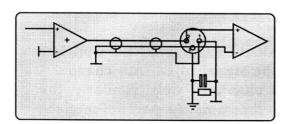

Pin 1 Ground/Shield Pin 2 Hot (+) Pin 3 Cold (-)

When linking the same source signal to several input channels, be aware that there is a limit to the number of channels an output source can "drive". A typical output source (e.g. a DSP crossover unit) can drive up to two amplifier channels before external line-drivers might be required to buffer the signal.

Unbalanced Input connections

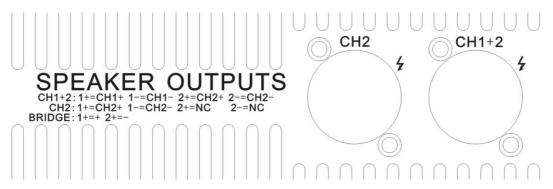

To connect an input to an unbalanced source, it is possible to connect pins1 and 3 in the XLR plug at the amplifier end of the cable. However, a better method is to connect pin 3 to the shield at the source end of the cable, as this usually results in better hum and noise rejection. Balanced input connections are recommended whenever possible.

Audio output connections

Speakon Output connections

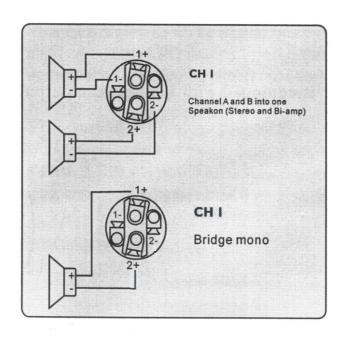

Refer to the instructions in this section if your amplifier is equipped with the Speakon output connectors

Speakon outputs-2-channel models

Speakon outputs

Two-channel amplifiers Additional connectors are provided for Channel 1.

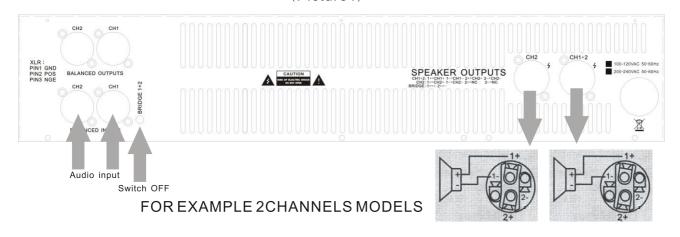

Output Mode and connections

Stereo Mode

Before setting the mode, please turn off the amplifier and slide the mode select switch to below (Picture 1). In this mode, Channel 1 an Channel 2 operate independently (Just traditional stereo amplifier). The signal input into channel 1 can be output from channel 1 only, similarly, the signal input into channel 2 can be output from channel 2 only. The many channels, one by one in order type pushes.

(Picture 1)

Bridge Mode

Before setting the mode, please turn off the amplifier and slide the mode select switch to above (Picture 2), channel 1 and channel 2 are bridged. At time, the signal input into channel 1 will be output from the bridge end. On other hand, the output level control of channel 2 should be turn down to smallest. Only the volume control of channel 1 are used to control the volume of whole system.

Professional Power Amplifier Specifications

SPECIFICATIONS				
ITEM	DA5002	DA5004	DA5008	
8Ω Stereo Power	$2 \times 500 \text{W}$	$4 \times 500 \text{W}$	8×500W	
4Ω Stereo Power	$2 \times 900 W$	$4 \times 900 W$	$8 \times 900 W$	
8Ω Bridged Power	$1 \times 1800 W$	$2 \times 1800 \text{W}$	$4 \times 1800 W$	
Frequency Response	20Hz−20KHz ±1dB			
THD+N 1KHz 1W 8Ω	<0.1%			
Signal to Noise Ratio 1KHz	>100dB			
Channel Separation 1KHz	>80dB			
Class	D			
Protection	Short, DCP, OVP, UVP, OCP, OTP			
Operating Voltage	90V-135V / 180V-265V			
Input Sensitivity	0.77V			
Input Impedance	20ΚΩ			
Dimensions($W \times H \times D$)	$483 \times 88 \times 396$ mm $483 \times 132 \times 396$ mm			
Packing Dimension	$580 \times 140 \times 560$ mm		$580 \times 180 \times 560$ mm	
Net Weight(kg)	7. 6	9. 5	14. 2	
Gross Weight(kg)	11.5	13	18. 2
